Cellular Pathology

From Audit: It would be useful to have a column in the Send Away Tests Database that lists when blocks/slides have been returned. This would allow the return of blocks/slides from referral centres to be monitored.

New column created and information now being entered for all cases returned in 2020.

Cellular Pathology

From Staff: Create a generic mailbox for Specimen Reception which can be used to receive declaration forms, confirmation of receipt forms, etc. As there are no faxing facilities available now, this will make the transfer of documentation more efficient.

Generic mailbox created:
midyorks.ddhspecimenreception@nhs.net

Cellular Pathology

From Staff: There are currently 6 temperature logs in the lab for fridge/freezers. It is a lot of paperwork for the early bird MLA to fill out. So consolidate all lab fridge/freezer temperature recordings onto one sheet for the MLA to sign off daily.

New temperature check documentation
FORMCP175
